The original version of this article unfortunately contains a mistake. The presentation of Eq. 8 is incorrect. The corrected equation is given below.

$$G = \arg \max_{G_n} \left\{ \lg P(\mathbf{x}|\lambda_{n,i_m}) + \lg P(\lambda_{n,i_m}|G_n) + \lg P(\mathbf{y}|v_{n,j_m}) + \lg P(v_{n,j_m}|G_n) + \frac{1}{T} \lg \sum_{t=1}^T P_t(G_n|z) \right\}, \quad (8)$$
